## Job Profile.

I am a Systems Engineer with a background in software development, systems analysis and design, and the application of best practices. I also hold a technical degree in Business Computing and a certification in IT Essentials: PC Hardware and Software from the Omar Dengo Foundation.

## Work Experience.

### | 4Geeks – Jul. 2025 — Nov. 2025

- At 4Geeks I spent six months performing all kinds of development tasks, such as systems support, module creation, UX/UI design and language migration of their main website, always using agile methodologies such as Scrum.
- I developed scalable and maintainable code, ensuring long-term software stability .

### | ExporPack S.A, **Software Engineer (Internship)**, 7/2024 – 7/2025

- I designed and implemented a software system for managing agricultural tasks, inventory, and crop control
- I participated in Scrum-based development teams to improve product delivery

### | Ponderosa Adventure Park - Oct. 2021 — Jun. 2024

- I worked in face-to-face sales and customer service.
- I developed communication, teamwork, and leadership skills through direct interaction with clients
